JUNIOR FULLSTACK DEVELOPER

Although I have been working in finance for over 10 years, I have always wanted to be a software developer, so earlier this year I decided now was the time to make the change. I enrolled in a Diploma in Full Stack Software Development and I am now actively pursuing an entry into the tech industry as a Junior Developer.

I bring an excellent background and professional exposure from finance with good attention to detail, analysing data, good communication skills and meeting deadlines. I am hard working, reliable, organized, pay attention to detail, logical, enthusiastic, eager to learn, personable and approachable.

TECHNICAL SKILL SET

Technologies

- HTML
- CSS
- JavaScript
- Python

Version Control

- Git

Portfolio Projects

Portfolio Project 1 - HTML/CSS Essentials

Allstar Bootcamp – a fictional fitness bootcamp
